

Engineering Fun for Kids

MISSION:

- * Build excitement about Engineering
- * Provide diverse role models through program volunteers
- * Supplement Science and Engineering Curriculum
- * To engage families in and educate families about Needham's Science and Engineering Curriculum

WANTED:

Family Volunteers

to lead fun engineering design activities

No experience needed!

- * **Any** Needham family or community members
- * **Anyone** interested in building, design and fun engineering activities with Hillside students
- * **Do NOT** need a technical or scientific background

Intrigued? Interested? Want to hear more?

- * With questions or to volunteer contact Liz Lee or Sophia Buckley at letsbuildinfo@yahoo.com

Equating STEM with FUN!

Welcome to Let's Build: Engineering Fun for Kids!

Engaging and Innovative Engineering Activities for Children

Let's Build is an innovative program bringing engaging, educational and age-appropriate engineering activities into elementary classrooms. Let's Build trains interested family and community volunteers to come into the classroom, work with the children and lead engineering design activities.

Who: Hillside students in kindergarten and grade 2

When: Spring 2013 (dates TBA)

Why: Let's Build activities:

- Excite students about science, technology, engineering, arts and math (STEAM) by demonstrating that engineering is fun, useful and accessible - everyone uses engineering!
- Supplement Needham's existing science curriculum
- Connect parents, family and community members to students in the classroom

Want more information? Interested in volunteering (no experience needed!)?
